Communis is secures multi-site FSC / PEFC Certification

Leading print and print management business Communis is has secured multi-site certification to the FSC (Forest Stewardship Council) and PEFC (Programme for the Endorsement of Forest Certification schemes) standards. The certificate covers all UK operations of the group and Communis teams working on site with clients.

The certification is part of a series of environmental initiatives the group has undertaken over the last few years which include a focus on reduction of waste and emissions and the ongoing maintenance of the environmental standard ISO 14001:2004.

Communis is Chief Executive, Steve Vaughan, said "Achievement of a multi-site FSC and PEFC certificate further confirms our long-term commitment to the environment. We have worked hard over the years to produce sound and verifiable environmental policies and procedures which are increasingly important to our clients.

Our responsibility to the environment includes plans to measure the group's carbon footprint and produce associated reduction targets. We will also continue to engage with our clients to understand how we can support their environmental goals."

ENDS

About Communis is

Communis is is the leading print partner to some of the biggest brands in Europe.

With a powerful offering combining a unique print management solution, transactional print and world-class print and production facilities, Communis is helps its clients communicate with their customers in more efficient, timely and effective ways - re-engineering processes to reduce costs and improve performance.

Communis is employs 2000 people across the UK and Europe.
